I'll drop 3.0 (S3_0 npf) target from this soon if nobody takes the task. Sveinung?

It can wait for 3.1.

With the generate_packets.py rewrite and other protocol handling changes in master, there would probably be some porting from branch to branch if this was now to be implemented to S3_1 and master. Also, no imminent users for the feature.

Likely to get postponed again, to 3.2.
