Freeciv - Bug #852070
Formatting error in man page about freeciv-gtk3.22
2019-12-12 12:04 AM - Jacob Nevins

Status: Closed | Start date: 
Priority: Low | Due date:

Sprint/Milestone: 2.6.1 | 

Description
The freeciv-client(6) man page section about freeciv-gtk3.22 doesn't display "[ -h|--help ]", and gives the following warning, due to a missing space:

troff: <standard input>:52: warning: macro 'B[' not defined

(Spotted while looking at Lintian errors. This doesn't actually fix the one identified there. That one seems to be S2_6 specific; I think it's caused by the long "freeciv-gtk2|freeciv-gtk3|freeciv-gtk3.22|freeciv-sdl|freeciv-sdl2|freeciv-qt|freeciv-xaw" in the SYNOPSIS, and earlier and later branches don't have so many client flavours. I don't know what if any formatting convention there is for a man page to document a lot of binaries which take the same options.)
