Description
Gtk-3.96 drops GtkButtonBox. GtkBox should be used instead. I think part of the conversion can be made with gtk-3.96 only, but a couple of simple ones can be carried out with gtk+-3.94 already (will make patch for that patch first, for pushing already before switching to 3.96)

Actually a new ticket was later opened for them, and is already pushed; Feature #869872
