Category:		Estimated time:	0.00 hour
Sprint/Milestone:	v3.8.8		
Description			

History

#1 - 2020-02-09 10:38 AM - Luigi Di Fraia

Three ways to do this:

- pre-seek the track and then run the track transfer drive code (simple)
- seek the track within the track transfer drive code (medium)
- step onto the track within the track transfer drive code (a bit more complex, as we should accelerate/decelerate in the stepping process too to get best performance)

#2 - 2020-02-12 09:12 PM - Luigi Di Fraia

- *Sprint/Milestone changed from v3.8.5 to v3.8.6*

#3 - 2020-06-13 09:24 AM - Luigi Di Fraia

- *Sprint/Milestone changed from v3.8.6 to v3.8.7*

#4 - 2020-06-13 09:26 AM - Luigi Di Fraia

- *Subject changed from Implement a Warp track transfer, e.g. to speed-up dumping of DIR track to Implement a Warp single track transfer, e.g. to speed-up dumping of DIR track*

#5 - 2020-09-30 10:31 PM - Luigi Di Fraia

- *Sprint/Milestone changed from v3.8.7 to v3.8.8*
